

RAILS ARE AWESOME

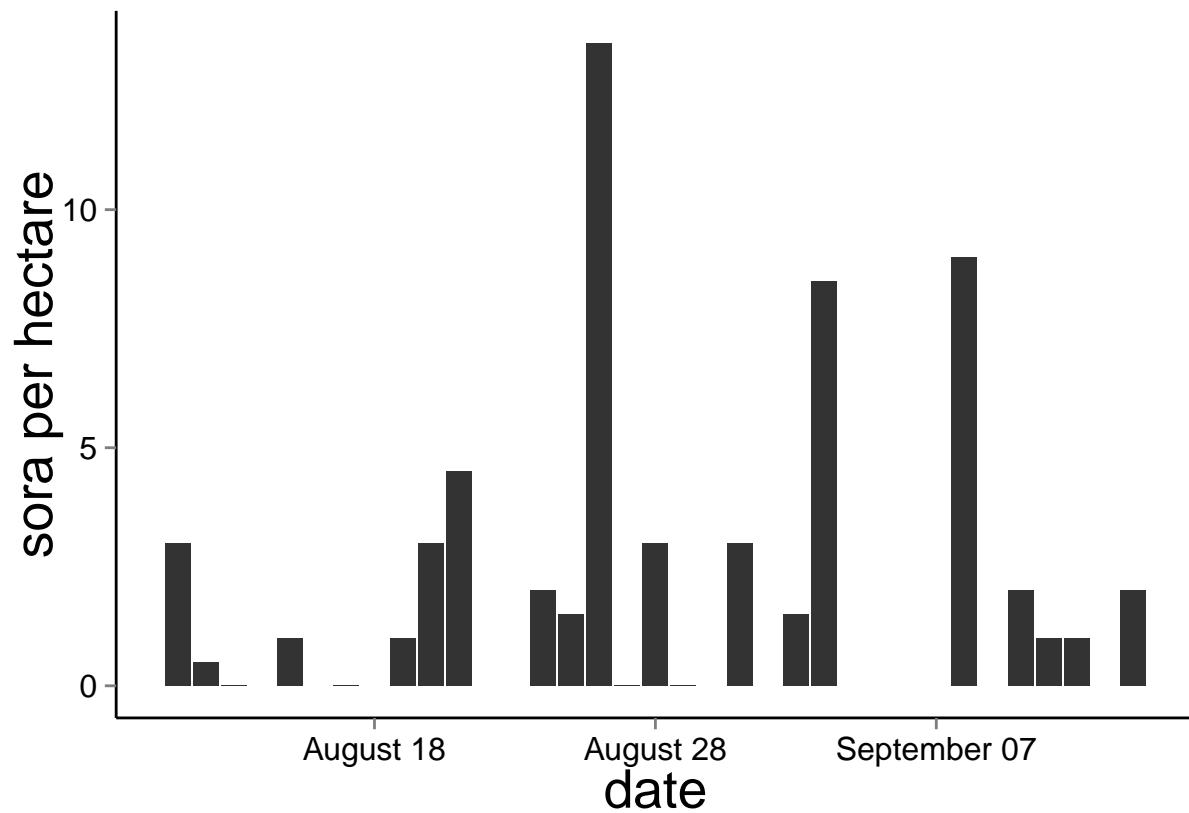

Progress Report 2015

Auriel M.V. Fournier

So you can type text here and talk about how cool rails are. Discussing other things is not possible. Only rails.

You can also cite my cool papers on rails (Fournier et al. 2013, Fournier et al. (2015)). You can also cite my editorial about the issue of unpaid work in ecology (Fournier and Bond 2015).

Fun with Graphs
